

C.869 Tug Skikda Harbour Authority

Description

Vittoria Tug C.869 is a 26m length harbor tugboat, 10m width, with 30 tons of traction at the fixed point (BP). The vessel has a clear aft deck and a forecastle, and is equipped with two ASD thrusters driven by diesel engines to speed it up at 12 knots.

The main tasks of the tug are: Port and coastal towing services; Assistance and emergency response operations in extreme conditions; Push - pull operations.

With a modern design to ensure the best workability both for traction or pushing operations in the harbor basins and for safe coastal towing; the Tug is studied, armed and equipped to carry out these missions in the best conditions of comfort and safety for the 7 members crew for 12 days of autonomy. The fittings and the arrangement of the equipment allow easy and safe access to the areas likely to be subject to maintenance and repair.

The Tug's prime qualities are: Very good power/performance ratio (speed-traction); Excellent ability to locate and communicate; capacity to comfortably maneuver and operate in bad sea and weather conditions; Good dynamic approaching ability; Excellent maneuverability; Excellent visibility for towing and approaching maneuvers; Very good layout for the safety of the crew; Robust manufacturing and good resistance to collision and shocks.

Main data

Length overall	26.00 m
Maximum beam	11, 00 m
Cruising speed	12 kn
