

# C.870 Vittoria Pilot and Multiservices Boat

## Description

A "V" hull and an overall length of about 16.7m characterize this Pilot Boat, operating also as personnel and goods transportation.

The vessel, featuring a continuous deck that extends from stern to bow, has an interior layout that guarantees seating for fourteen people in addition to those of the Commander and the Navigator.

The main features of the unit, such as bow thrusters, windows and bow fender; have been designed to best drive ships inside and outside the port and to transport the pilot on the boats to be driven up to their mooring at dock or leaving the port areas.

This vessel is able to perform its tasks even under extreme sea and weather conditions and can operate easily on large and very large ships.

## Main data
