C855
49' INTERCEPTOR
HIGH SPEED BOAT

49" INTERCEPTOR High Speed Boat

The 'Interceptor 43' has been designed and built to pursue and block suspicious or illegal crafts . The top speed of over 60 knots and the excellent sea keeping make it ideal for this type of patrolling. The two front consoles (for driver and navigator) are twins and interchangeable, for safety and cooperation. Both are equipped with vessel controls, multifunction monitor with Radar, GPS plotter, echo sounder and main data engine instruments. The rear consoles are for chief engineer (on the right, with all data engine, vessel alarms, bilges and firefighting controls), and for telecommunications (on the left, with VHF, night visions and any specific system for communications and patrolling). At bow there is the gunsmith location, armed with 7.62 Nato with manual control on 270 degree. Other more sophisticated weapon systems can be fitted on board as option. On request, the forward cockpit can accommodate the assault troops landing from the bow. The bow is truncated to allow the landing or to boarding other vessels. The pilot post can be built bullet proof according customer requirements.

MAIN DATA

YARD NUMBER :	C855
DELIVERY DATE :	2013
DIMENSION :	
Overall length:	15,00 m
Moulded length :	13,10 m
Inside beam:	2,90 m
Depth:	2,00 m
Draft:	0,76 m
Full load displacement:	10 t
Payload:	0,8 t
Hull Material :	GRP
PERFORMANCES :	
Max speed :	65 kn
Cruising speed:	55 kn
Range:	250 nm
Crew:	4
Fuel tanks:	2 x 1000 L
Main engine :	
	2 x Seatek 800 PLUS TYPE APPROVAL
Power :	
	2 x 573 kW @ 3000 rpm
Propeller:	
	2 x Arneson Surface Drive Heavy Duty
	2 x ASD 10
